FORWARD LOOKING SONAR

# FLS 3D - 30 Degree

## Introduction

The FLS 3D - 30 Degree Forward Looking Sonar is a ground breaking single transducer Forward Looking Sonar allowing all boatowners access to a commercial level Forward Looking Sonar. The FLS 3D - 30 Degree displays a 3D visualization of the underwater seabed ahead of the boat giving the captain ease of mind when navigating poorly or uncharted water.

The FLS 3D - 30 Degree will connect to any third party display via its HDMI and VGA video output. Simply connect the video cable to the displays video input and you are up and running.

The FLS 3D - 30 Degree also has direct integration to Raymarine, Simrad, B&G and Lowrance MFD and is easily connected to the network via an RJ45 cable. Once connected, the EchoPilot app will appear on the MFD allowing users to see forward looking sonar on their display in real-time. Offering dual viewing of sea charts and forward looking sonar at the same time, the display can also be used in split screen for the ultimate convenience. When the FLS 3D - 30 Degree is connected to the MFD, users will benefit from full 360 degree rotation of the 3D image via touch, as well as the zoom function. This will give a closer view of how the seabed terrain looks ahead and potential hazards are shown in real-time.

The FLS 3D - 30 degree scans the seabed in a 30 degree horizontal plane and 90 degree in the vertical plane. The forward range is up to 200m and 100m depth.

The FLS 3D - 30 degree is equipped with a new technology called Average Forward Depth. The Average Forward Depth is the average depth of the water ahead, based on sonar readings. knowing the average depth you are sailing towards is a vital tool for navigating compared to the normal depth sounder that only gives you the depth underneath your vessel.

The importance of Forward Looking Sonar Technology is the depth to range ratio. The FLS 3D - 30 degree has a staggering 20 x depth ratio! This means that you will see 100 meters ahead with only 5 meters of water underneath your boat. This is the highest ratio in Forward Looking Sonar Technology!

The FLS 3D Forward Looking Sonar has the ground breaking technology of Real-Time Forward Looking Sonar. The display updates every one second so the captain will always be updated on the seabed terrain and potential hazards ahead.

## Visual Processor

## Transducer Interface

## FLS 3D Transducer

## On/Off Button Or Keypad

SAFE SAILING

FORWARD LOOKING SONAR

# FLS 3D - 30 Degree

## Overview FLS 3D - 30 Degree Gen 4 - For Raymarine, Simrad, B&G and Lowrance Integration

### Standard Kit FLS 3D - 30 Degree Gen4

- 1 x FLS 3D 5" Transducer
- 1 x 5" Bronze Thru Hull Skin Fitting
- 1 x Transducer Extension Cable
- 1 x FLS 3D Transducer Interface Box
- 1 x FLS 3D Data Cable
- 1 x FLS 3D Visual Processor
- 1 x On/Off Switch
- Power cables

### Optional Parts FLS 3D - 30 Degree Gen4

- Steel Skin Fitting
- Aluminum Skin Fitting
- Custom Data Cable 20 - 100 meters
- Additional Transducer Extension Cables
- Additional On/Off Switch
- Extension Cable for On/Off Switch

## Overview FLS 3D - 30 Degree - For 3rd Party Display

### Standard Kit FLS 3D - 30 Degree

- 1 x FLS 3D 5" Transducer
- 1 x 5" Bronze Thru Hull Skin Fitting
- 1 x Transducer Extension Cable
- 1 x FLS 3D Transducer Interface Box
- 1 x FLS 3D Data Cable
- 1 x FLS 3D Visual Processor
- 1 x FLS 3D Keypad
- Power cables

### Optional Parts FLS 3D - 30 Degree

- Steel Skin Fitting
- Aluminum Skin Fitting
- Custom Data Cable 20 - 100 meters
- Additional Transducer Extension Cables
- Additional Keypad
- Extension Cable for Keypad
